PROFESSIONAL SUMMARY

Motivated Software Developer with hands-on experience in full-stack development, scalable backend systems, and real-time applications using Python, React.js, Node.js, and Firebase. Skilled in building secure APIs, authentication systems, and event-driven architectures with strong problem-solving abilities and passion for software engineering.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++
- **Frontend:** React.js, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, Material UI, ShadCN
- **Backend:** Django, Flask, ASP.NET Core (.NET), Node.js, Express.js
- **Database:** MySQL, PostgreSQL, MongoDB, Firebase Firestore
- **Tools & DevOps:** Git, GitHub, Linux, Docker (Basics), CI/CD
- **Concepts:** Data Structures & Algorithms, OOP, System Design, REST APIs, JWT, OAuth, RBAC, Machine Learning

PROFESSIONAL EXPERIENCE

Software Engineer Intern (Full Stack Developer) | Zentrix Solutions (Nov 2025 - Apr 2026)

- Engineered and optimized full-stack web applications by integrating RESTful APIs to enhance system performance and scalability
- Configured secure authentication mechanisms (JWT/OAuth) and contributed to database design, query optimization, and efficient data handling

Web Development Intern | Proglan FutureTech Pvt. Ltd.

(June 2023 - May 2024)

PROGLAN

- Enhanced backend functionalities using Python and REST APIs, improving application performance, scalability, and data processing efficiency

PROJECTS

ChronoSend | Personal Project

(Mar 2026 - Present)

- Built a scalable, real-time message scheduling system with event-driven execution and multi-channel delivery
- Architected a secure backend system with Firebase integration, enabling real-time data synchronization and automated task management

SchoolGuard | Personal Project

(Dec 2025 - Present)

- Created a centralized safety platform with real-time emergency alerts, role-based access, and multi-user monitoring
- Planned and executed scalable backend architecture enabling secure data management and real-time communication across institutions

Vaultify – Secure Cloud Storage | Personal Project

(Nov 2025 - Dec 2025)

- Built a secure cloud storage platform with OAuth-based authentication and user-isolated file management
- Created a scalable file upload and organization system using React and Tailwind CSS

FoodZzz – Smart Food Ordering Platform | Personal Project

(May 2025 - Aug 2025)

- Built a full-stack food ordering platform with dynamic cart, checkout flow, and secure OAuth-based authentication
- Enabled payment gateway functionality and role-based admin dashboard for efficient order management

EDUCATION

Master of Computer Applications | GLS University

CGPA : 9.47 (Avg.) | (Aug 2024 - Apr 2026)

Bachelor of Computer Applications | GLS University

CGPA : 8.80 | (Aug 2021 - May 2024)

H.S.C. (GSEB) | The H.B. Kapadia New High School

Percentage : 66.93% | (2021)

S.S.C. (GSEB) | The H.B. Kapadia New High School

Percentage : 65.50% | (2019)

AREA OF INTEREST

- Scalable Software Systems & Distributed Architecture
- Backend Engineering & RESTful API Development
- Authentication & Application Security (JWT, OAuth, RBAC)
- Real-Time & Event-Driven Systems
- Full Stack Application Development
