PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building full-stack and AI-powered applications using Python, React.js, TypeScript, Node.js, REST APIs, and PostgreSQL. Experienced in developing LLM-powered applications, Retrieval-Augmented Generation (RAG), agentic workflows, secure authentication, and scalable backend services. Strong foundation in data structures, system design, APIs, databases, and application security.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++
- **Frontend:** React.js, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, Material UI, ShadCN
- **Backend:** Django, Flask, Node.js, Express.js
- **Database:** MySQL, PostgreSQL, MongoDB, Firebase Firestore
- **Tools & DevOps:** Git, GitHub, Linux, Docker (Basics), CI/CD
- **Concepts:** Data Structures & Algorithms, OOP, System Design, REST APIs, JWT, OAuth, RBAC, Machine Learning, AI, RAG

PROFESSIONAL EXPERIENCE

Software Engineer Intern (Full Stack Developer) | Zentrix Solutions (Nov 2025 - Apr 2026)

- Engineered full-stack applications and integrated RESTful APIs across core workflows during a 6-month internship, improving backend scalability and application performance.
- Implemented JWT/OAuth authentication across 5+ modules and optimized database queries to improve backend security and reliability.

Web Development Intern | Proglan FutureTech Pvt. Ltd.

(June 2023 - May 2024)

PROGLAN

- Developed and integrated 15+ REST API endpoints, implementing JWT/OAuth authentication and optimized database queries for secure, scalable backend services.

PROJECTS

NeuroVault AI – Enterprise Knowledge Platform | Personal Project (July 2026 - Present)

- Built an enterprise AI knowledge platform using React.js, TypeScript, FastAPI, PostgreSQL, LangChain, LangGraph, RAG, vector search, and LLMs for secure, context-aware document retrieval.
- Engineered document ingestion, embeddings, semantic retrieval, multi-agent workflows, source-cited responses, JWT/RBAC authentication, and streaming AI chat with Docker-based deployment.

ChronoSend & SchoolGuard | Personal Projects

(Dec 2025 - Present)

- Built **ChronoSend**, a real-time message scheduling platform, and **SchoolGuard**, a safety monitoring platform with automated alerts, role-based access, and multi-user workflows.
- Designed secure, scalable backend services and REST APIs with real-time data synchronization, automated task management, and reliable communication across users and institutions.

Vaultify – Secure Cloud Storage | Personal Project

(Nov 2025 - Dec 2025)

- Built a secure cloud storage platform with OAuth-based authentication and user-isolated file management
- Created a scalable file upload and organization system using React and Tailwind CSS

FoodZzz – Smart Food Ordering Platform | Personal Project

(May 2025 - Aug 2025)

- Built a full-stack food ordering platform with dynamic cart, checkout, OAuth authentication, payment integration, and role-based admin dashboard for secure order management.

EDUCATION

Master of Computer Applications | GLS University

CGPA : 9.47 | (Aug 2024 - Apr 2026)

Bachelor of Computer Applications | GLS University

CGPA : 8.80 | (Aug 2021 - May 2024)

H.S.C. (GSEB) | The H.B. Kapadia New High School

Percentage : 66.93% | (2021)

S.S.C. (GSEB) | The H.B. Kapadia New High School

Percentage : 65.50% | (2019)

AREA OF INTEREST

- Scalable Software Systems & Distributed Architecture
- Backend Engineering & RESTful API Development
- Authentication & Application Security (JWT, OAuth, RBAC)
- Real-Time & Event-Driven Systems
- Full Stack Application Development
